Webanywhere have been providing schools with website, broadband and e-learning solutions since 2003. We're committed to improving teaching and learning in and out of the classroom using online technology.

We are an official Moodle Partner, a Totara Platinum Partner, and an Authorised Google Apps reseller. In 2012 we were appointed as a supplier to the UK Government Procurement Service for learning platforms, having demonstrated the quality and value for money of our service.

Our highly skilled and knowledgeable team has many decades of combined experience in ICT for education, and our broadband service reflects this. It is tailored to the needs of education - providing the fastest, most reliable internet service possible, the ability for schools to control their own filters, and at a cost that will not break your budget.

Is it time to switch?

**Webanywhere make the move to faster,
more cost effective broadband quick and easy**

Fast

The fastest possible speed available

Secure

FortiGate filtering system & anti-virus software

Easy to switch

A seamless switchover from your current supplier

Value for money

Unlimited support as standard

An easy switch

Faster internet without the hassle

We deal with your current provider for you, and ensure the switch is seamless - so you won't lose connection, data, resources or learning time.

Outstanding support

Whenever you need it

24x7 comprehensive support comes as standard. We can assist you via online help tickets and chat, alongside telephone support at any time, day or night.

We provide a full Service Level Agreement, so you can be sure you are receiving an outstanding internet provision when you switch to School Broadband.

We provide the fastest speed available in your area, and could save you up to 50% on your current provider

"We were nervous about moving to a non LEA supplier. However, we are delighted with the service we receive from Webanywhere...they managed the whole changeover without any issues or downtime and dealt directly with the LEA for us. We felt supported at every stage and I would recommend that other schools use School Broadband from Webanywhere"

Phil Brown, Network Manager, Staindrop School, Darlington

FortiGate content filtering system

Safeguarding your pupils online

Safeguarding pupils from online risks is a priority for every school - and it's a subject that Ofsted take very seriously. Make sure your school provides outstanding online safety with the FortiGate bespoke filtering system.

The on-site filtering system allows you to take control of what can be accessed in your schools, rather than the 'one-size fits all' approach associated with centrally administered school internet provision. This ensures that your school can access the information it requires, when it is needed.

Your security is paramount

as standard, we provide

FortiOS 5

The world's most powerful security operating system

Key Features and Benefits

More Security - Fighting Advanced Threats

The new advanced anti-malware detection system adds an on-device behaviour-based heuristic engine and cloud-based AV services that includes an operating system sandbox and botnet IP reputation database. Together with superior industry-validated AV signatures, FortiOS 5.0 delivers unbeatable multi-layered protection against today's sophisticated malware.

More Control - Securing Mobile Devices

More Control to secure mobile devices and BYOD environments by identifying devices and applying specific access policies as well as security profiles, according to the device type or device group, location and usage.

More Intelligence - Build Smart Policies

More Intelligence with automatic adjustment of role-based policies for users and guests based on location, data and application profile. Enhanced reporting and analysis also provides administrators with more intelligence on the behaviour of their network, users, devices, applications and threats.

Put your Broadband to best use - get the total Webanywhere package

Web technology that engages, motivates, and makes life easier for teachers

The primary specific learning platform that's simple and intuitive to use. It allows teachers to reward pupil achievement, access resources and reinforce key curriculum learning outcomes.

Learnanywhere is an effective solution for time-pressured teachers and provides a connection between home and school - with access anytime, anywhere.

School websites made easy! We set up the website according to your specifications, and the simple content management system ensures any member of staff can update the site, anytime, anywhere.

School Jotter sites look great on any device, and are feature rich and search engine optimised. Expert customer support comes as standard, via freephone, email and live web chat.

Promotes inclusion

Engages parents

Raises standards

Easy to edit

Multi-platform

Unlimited Support

Learner Journey

An e-portfolio that allows students to record their thoughts, accomplishments and favorite learning content from around the web.

Learner Journey builds a digital record of achievement, which can be used to demonstrate learning. It is also a safe internal social network, allowing for communication and collaboration.

Encourage collaboration

Showcase learning

Build your CV

Google Apps

Create, collaborate and share with Google's powerful suite of educational applications.

The Google Apps for Education package is specifically designed for schools' needs.

Used by millions of students & educators worldwide, Google Apps for Education saves everything automatically in the cloud and allows anytime, anywhere access to all your files, allowing more flexible, collaborative learning
